

IFRAH FAROOQ

Srinagar, India | meerifrahunnisa@gmail.com | linkedin.com/in/meer-ifrah-un-nisa-8137a9212

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience architecting front-end web architecture and back-end web applications, taking projects from conception to final product with strong attention to detail and organizational skills. Proficient in front-end languages including HTML5, CSS3, and JavaScript, with deep expertise in React.js and TypeScript. Experienced building server-side applications with Node.js and NestJS, designing and developing RESTful APIs, and working with databases including MySQL, MongoDB, and PostgreSQL. Proven track record of delivering cross-platform optimization and mobile-responsive web applications. Core engineer on Adverti Chat — an AI-powered conversational ad analytics product launched at Convergence India 2026, Bharat Mandapam, New Delhi — and experienced across the full digital marketing technology stack including Google Ads, Meta Ads, Amazon Ads, marketing automation, and e-commerce development.

WORK EXPERIENCE

Full Stack Developer | Advergrow Solutions | Ahmedabad, India (Remote)

July 2024 – Present

Advergrow Solutions (advergrowolutions.com) is a digital marketing technology company offering Google Ads, Meta Ads, Amazon Ads, SEO, social media marketing, content marketing, AI solutions, email marketing, marketing automation, and e-commerce website development. Their product Adverti has two components: Adverti App (self-serve ad creation) and Adverti Chat (AI-powered conversational ad analytics).

- Served as a core full stack developer on Adverti Chat — an AI-powered web application that connects live ad accounts to deliver real-time spend analysis and recommendations — taking the product from conception to final product and presenting it at Convergence India 2026, Bharat Mandapam, New Delhi.
- Designed and developed front-end web architecture for multiple web application portals (customer, admin, dashboard) using React.js and TypeScript, with a focus on user interaction design and cross-platform optimization, resulting in a 30% improvement in user engagement.
- Engineered the conversational AI query interface using OpenAI API, allowing users to interact with their live ad account data in plain English — meeting both technical requirements and consumer needs for simplicity and transparency.
- Ensured responsiveness of applications and cross-platform optimization for mobile phones and desktop browsers across all portal interfaces.
- Developed back-end web applications and created servers and databases for functionality using NestJS and PostgreSQL, building a scalable multi-tenant architecture to support thousands of user accounts.
- Designed and developed RESTful APIs integrating Meta Marketing API and Google Ads API for real-time campaign data retrieval, account management, and performance reporting.
- Applied strong project management and organizational skills in Agile sprint planning sessions, reducing development cycle time by 20% while coordinating across cross-functional teams.
- Built a background task automation system with BullMQ and Redis, reducing critical API failure rates by over 40% — demonstrating attention to detail in system reliability design.
- Developed a multi-channel notification system (email, in-app) for real-time and scheduled alerts, increasing timely user actions by 35%.
- Optimized REST API performance through improved server-side architecture and service communication patterns, boosting API response efficiency by 25%.
- Contributed to e-commerce website development features, ensuring conversion-optimized, user-friendly, and visually appealing storefronts for client brands.

Software Developer | Girnarcare Pvt Ltd | Jaipur, India

May 2022 – July 2024

- Developed front-end website architecture and designed user interactions on web pages using React.js, building responsive, mobile-first UI components for a corporate facility management web application.
- Created servers and databases for functionality by developing back-end web applications using Node.js and Express.js, handling CRUD operations for assets, users, and facility data.
- Designed and developed RESTful APIs to manage facility records, issue tracking, and user administration, ensuring cross-platform optimization across devices.
- Integrated MongoDB with optimized indexing and schema design for performant, scalable database functionality.
- Implemented secure user authentication and role-based access control (RBAC) using JSON Web Tokens (JWT), meeting both technical and security requirements.
- Demonstrated strong problem-solving skills and attention to detail through Git-based version control, peer code reviews, and Agile sprint delivery.

PROJECTS

Adverti Chat — AI Conversational Ad Analytics | Advergrow Solutions | adverti.com 2025 – Present

★ Launched at Convergence India 2026 | Bharat Mandapam, New Delhi

- Led full stack development of Adverti Chat from conception to final product — an AI web application connecting live Meta Ads and Google Ads accounts to deliver ad audits, spend breakdowns, and revenue attribution in plain English within 60 seconds.
- Designed front-end web architecture and user interaction design using React.js and TypeScript; ensured responsiveness of the application across mobile phones and desktop platforms.
- Built back-end web applications and server-side architecture in NestJS with PostgreSQL, enabling multi-tenant account management and real-time ad data processing.
- Designed and developed RESTful APIs integrating Meta Marketing API and Google Ads API for live campaign data retrieval and diagnostics.
- Implemented the AI conversational query engine via OpenAI API, enabling plain-English interaction with structured ad account data.

Adverti App — Self-Serve Ad Creation Platform | Advergrow Solutions | adverti.com 2024 – Present

- Designed and developed front-end web architecture for a 4-step guided ad creation workflow, enabling users with no advertising experience to launch Meta and Google Ads campaigns in under 10 minutes.
- Built multi-role web application portals (admin, customer, dashboard) with cross-platform optimization and mobile responsiveness using React.js and TypeScript.
- Developed back-end web applications and designed APIs integrating Meta Marketing API and Google Ads API for end-to-end campaign creation and reporting.
- Implemented marketing automation using BullMQ and Redis, reducing ad operation failure rates by 40%.

GirnarCare — Corporate Facility Management Web App | Girnarcare Pvt Ltd | girnarcare.com 2022 – 2024

- Developed front-end website architecture with dynamic filtering and pagination using React.js, ensuring responsiveness across devices including mobile phones.
- Created servers and databases for functionality using Node.js, Express.js, and MongoDB; designed and developed RESTful APIs for asset management, issue tracking, and user administration.
- Implemented JWT-based authentication with role-based access control (RBAC).

EDUCATION

Master of Computer Applications (MCA) — Computer Science 2021

University of Kashmir, Srinagar, India | GPA: 4.0 / 4.0

Bachelor of Computer Applications (BCA) — Computer Science 2018

University of Kashmir, Srinagar, India | GPA: 4.0 / 4.0

TECHNICAL SKILLS

Front-End Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

JavaScript Frameworks: React.js, Next.js, Node.js

Back-End Development: NestJS, Express.js, Strapi, Server-Side Architecture, RESTful API Design and Development

Databases: MySQL, MongoDB, PostgreSQL, Redis

Cross-Platform & Mobile: Responsive Web Design, Cross-Platform Optimization, Mobile-First Development

AI & Automation: OpenAI API, Conversational AI, BullMQ, Task Scheduling, Marketing Automation

Ad Tech APIs: Meta Marketing API, Google Ads API, Amazon Ads API

Cloud & DevOps: AWS, Docker, Linux, PM2, Git, GitHub

Security: JWT (JSON Web Tokens), OAuth 2.0, Role-Based Access Control (RBAC)

Domain Expertise: Full Stack Web Application Development, Digital Marketing SaaS, Ad Campaign Management, Ad Spend Analytics, E-commerce Development, Growth Marketing

Soft Skills: Project Management, Organizational Skills, Problem Solving, Attention to Detail, Cross-Functional Collaboration, Communication

Methodologies: Agile, Scrum, Code Review, Sprint Planning, Version Control

Tools: Postman, VS Code, ESLint, Prettier, SQL
